This is an entry from our [Holiday Gift Guide](#). We will be updating it daily through the holidays, so be sure to check it often for some great gadget [gift tips](#)!

If you are looking for something different in the [home](#) stereo area, look no further than the Tivoli Audio Music System. This is an all-in-one solution that actually works - very well. The user interface is super-simple, and the buttons on the unit are exactly what they need to be. Nothing too advanced for anyone here. The Tivoli Audio Music System packs in an AM/FM tuner, CD player, and even an auxiliary input for your MP3 player of choice. The LED panel is perfect at 32 characters, and it even dims itself when you turn the lights off so as not to disturb your movie-watching (or sleep) experience. Our favorite feature? The SpacePhase setting, that makes audio sound even more clean and full - seriously, it rocks.

Price: [\\$599](#) ([Compare Prices](#))
