TECH I SUPPORT: TIVOLI AUDIO MODEL TWO STEREO

11:00 AM, JUNE 25 2009 BY [EMILY HSIEH](#)

One of the things that makes me happiest on a daily basis is [my Tivoli stereo](#). With the cherry wood casing and pared down aesthetic, it's hands-down the chicest sound system on the market. The audio quality is amazing—despite the compact size, the speakers are really clear and rich and are more than adequate for the occasional late night dance party that's been known to go down in my apartment!

As a radio, it can pick up even really remote stations without any static. It's really easy to plug an iPod into the back, though I highly recommend taking things a step further, using an [Airport Express](#) to stream music wirelessly from the iTunes library on your computer to the stereo. Seriously. It'll change your life.
